REVOLTA ONE

HOW TO SAVE MORE ON YOUR HOME BATTERY WITHOUT YOU HAVING TO DO ANYTHING

EARN BACK 100% OF YOUR HOME BATTERY COSTS IN 4 YEARS (INSTEAD OF 10)

www.revolta.ai

Edition 11/2025

Why Revolta One Exists

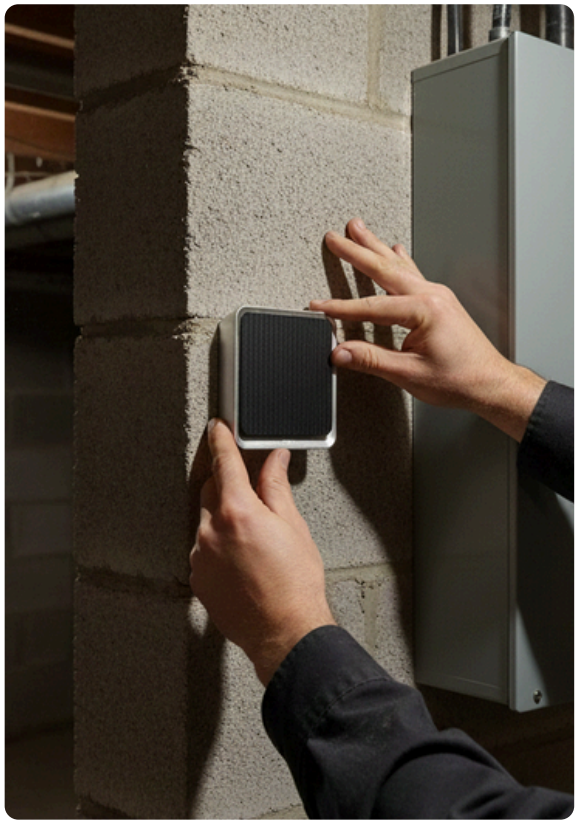
More and more people have solar panels and a home battery. But almost no one is getting the most out of them.

Not because their battery is bad, but because it is almost impossible to know when to charge or discharge it yourself.

- When is electricity cheap?
- When is it best to sell back?
- When is your battery a gain or a loss?
- And how will that evolve next year?

That's why most people simply leave things as they are. And as a result, they lose a lot of money, month after month.

ReVolta One solves that problem.
Without you having to learn or set anything.



What is ReVolta One?

ReVolta One is a small box that you connect to your home battery.

It does the thinking: charging, discharging, timing, market prices, peak consumption, and much more. **It makes your battery smarter, so you automatically pay less and sometimes even earn extra money.**

In simple words:

👉 From now on, your battery will always work at the best time.

👉 You don't have to do anything.

👉 And your energy costs will automatically drop.

Why do I need this?

A battery only works truly well when it is charged or discharged at exactly the right time.

But that right moment changes every hour.
It is impossible to keep track of it yourself.

This is what happens...

Without
ReVolta One

- Your battery sometimes **charges when** electricity is **expensive**.
- It sometimes discharges when it would actually have been better to **wait**.
- You sometimes inject at a time when the price is **low or negative**.
- **You miss opportunities** to charge cheaply or sell at peak times.

With
ReVolta One

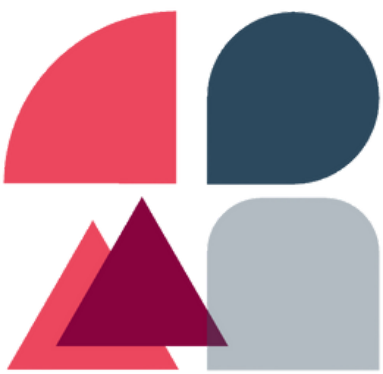
- Your battery **charges when the price is low.**
- She discharges when you get the **most benefit**.
- Injection is **only** done **when it yields money**.
- Negative electricity prices? Your battery **automatically protects** you.
- Your **costs decrease** without you having to do anything.

How does it work?
(simply explained)

1 You plug in ReVolta One via USB-C and the internet.

2 The system automatically finds your battery (Victron, SMA...).

3 From that moment on, the box takes care of everything itself.



It continuously looks at:

- your consumption,
- your solar panels,
- the weather forecast,
- the price of electricity: even hour by hour,
- potential income,
- and the health of your battery.

And then it makes the best possible decision.
Every minute, automatically.

What's in it for you?

✓ Pay less for electricity

You use less from the grid at expensive times.

✓ Dealing smartly with negative or cheap electricity prices

Your battery charges when it is beneficial, without risk.

✓ Opportunity to earn extra money (optional)

With Trader Mode your battery can automatically participate in the energy market. Just turn it on, ReVolta does the rest.

✓ Your battery lasts longer

The system protects against incorrect settings and overload.

✓ You'll gain back your battery investment faster

ReVolta One reduces the payback time for your home battery from 10 years to just 4 years.

✓ You no longer have to worry about energy

You don't have to study apps, understand charts, or track prices.

✓ For a second home? Even more interesting.

Even when you're not there, your battery continues to work sensibly or even earn extra money.

How much does it cost?

ReVolta One Core

~~€266,20~~ **€212,-***

- **1x ReVolta One with all the trimmings**

Optional subscriptions:

- Trader mode (earn money with your home battery): **€14.99**/month
- Expert mode: **€14.99**/month
- Conversational AI interface (in 2026)
- Battery Health Package (in 2026)

ReVolta One Premium

~~€845,79~~ **€422,9***

- **1x ReVolta One with all the trimmings**

Lifetime free access to:

- Trader mode (earn money with your home battery)
- Expert mode
- Conversational AI interface (in 2026)
- Battery Health Package (in 2026)

** Prices are incl. VAT*

Why such a big discount?

Because early adopters help us grow this technology faster.

You take a small gamble, and we reward you for that.

What if it's not for me?

Then you will get your money back.

👉 **12-month money-back guarantee. No questions, no hassle.**

We believe so strongly that ReVolta One makes your battery more cost-effective that we dare to offer it.

Why buy now?

- The discount is valid for a **limited time** only.
- The energy market is becoming more unpredictable every year.
- The faster your battery works smarter, the **faster** you save.
- And you don't take any risks with the **money-back guarantee**.

ReVolta One finally makes your battery truly profitable.
No hassle. No risk. Half the price.
